Nutri-BMD

Bacitracin Methylene Disalicylate 10% W/W

Antibiotic Growth Promoters (A.G.P.)

Antibacterial growth promoters, or AGP, involve the use of antibiotics in poultry feed in order to improve overall growth and feed conversion.

AGPs help boost the flock's performance and promotes its good health by controlling growth-suppressing metabolites that are the result of microbes.

Nutri-BMD

Nutri-BMD is a medicated feed additive containing Bacitracin Methylene Disalicylate which improves feed conversion efficiency and increases growth rate.

Dosage

For increased rate of weight gain, egg production, improved feed efficiency: 250 gm per ton of feed.

For prevention and control of necrotic enteritis: 500 gm per ton of feed or as advised by the consultant.

**Packing:
25 Kg Paper Bag**
